

SM15

features:

- very high sound pressure levels
- low profile & stunning looks
- left / right configurations
- superb vocal clarity
- secure tidy cabling
- bi-amp / passive
- touring cases
- hand crafted

The SM15 is a wedge monitor refined. In a single glance its ultra low profile and smart design make it an asset to any stage. Below the hood there's plenty to match. The power handling when Bi- Amp'd is 1000W/Bohm resulting in an SPL high enough to cut across the din of large stage environments. Even in Passive mode we can recommend a amplifiers up to 1000W/Bohm creating a very useful tool for more basic situations.

Switching from Passive to Bi-Amp is by a rugged recessed switch. Also recessed and positioned at stage level are Speakon NL4 input and link connections at both ends of the cabinet facilitating tidy and secure cabling.

Bass porting is directed low to give the the necessary kik whilst minimising bottom end feedback issues.

Behind the smart foam finish is a reinforced metal grill, these combined create the boot and beer resistant cabinet.

All this comes in a package whose overall weight is less than 30 Kg meaning the SM15 will make light work of rapid set changes.

applications:

- stage / floor monitor
- indoor / outdoor
- install / tour
- club and venue
- event and conferencing

permanent installations in:

- theatres
- clubs
- places of worship

MONITOR SERIES SM15
